

ME2 / MULTIPLIER EVENT 2

“Results of Innovative Educational Model and Promote Transformational Changes”

8 November 2024

Organised and hosted by UNIVERSITY OF RUSE "Angel Kanchev" / BG / Ruse
location Conference main Hall, the event starts at 9.00

CALL FOR ATTENDEES OF MULTIPLIER EVENT

It's always exciting to see how these events bring together diverse individuals with unique perspectives and experiences.

Project objective - Design an innovative educational model, framed by trans-disciplinary and forward-looking approaches, integrating learning outcomes for complex skills development, more conducive to new forms of cooperation for greening jobs & enterprises, maximizing the impact on partners.

With an increasing interest of organisations in new trends such as workplace digitisations and intelligence skills for sustainable green business creation, the project partners invite teachers to apply for the intensive study programme aimed to enhance the readiness to resolve complex economic, environmental, and social development issues.

1. What is Multiplier Event all about?

Share the results of the Innovative Educational Model and promote transformational changes toward green & digital transition.

To inform, engage and multiply good practices and cooperation in education and training, sharing project results and Innovative Educational Model/ IEM to promote forward-looking curricula with green concepts and responsible behaviours centred on resources-related concerns.

2. What are the benefits for participants?

- Provides a joint learning experience with transnational learning, teaching, and training for green skills and environmental progress.
- To add value through multicultural and trans-disciplinary approaches to greening jobs & enterprises
- To perform transnational learning, teaching and training activities on relevant knowledge and good practices

The interested participants shall communicate and send their short request (full name, belonging organisation, city) to the Bulgarian partner at least one day before the event starts:
